

ENTERPRISE SOLUTIONS

Trend Micro is focused on
securing the exchange of digital information—
to ensure your business is "always on."

Crime Pays—at Your Expense

Cybercrime is now generating higher profits than the illegal drug trade. Don't let your enterprise, or your customers, pay the price.

Total Web Threat Protection

For two decades, Trend Micro has led Internet content security innovation and is now the first to offer comprehensive web threat protection.

Global Threat-Sensing Network

With real-time threat intelligence, Trend Micro is positioned to predict, respond, and pre-empt attacks.

Integrated Threat Management

Integrated, multilayered web threat solutions deliver continuous protection against:

- Spyware
- Spam
- Viruses, Trojans, Worms
- Phishing
- Bots
- Inappropriate Content
- Blended Threats
- Data Leaks, Loss, and Insider Threats

WEB REPUTATION

Innovative Web Reputation stops web-based threats at the Internet layer—before they can steal your assets, slow productivity, and damage your brand image. It protects users by blocking access to web pages known for spyware, Trojans, and other malicious activity.

Blocks Access to Malicious Sites

Employs multiple detection techniques to identify malicious sites before users click on them

Delivers Instantaneous Updates

Continually tracks and rates millions of domains to ensure the most reliable, up-to-date protection

Protects Against Zero-Day Threats

Stops unknown web-based threats without relying on signature files

Secures Endpoints off the Network

Protects PCs and laptops at the web layer—so they are protected on or off your network

Improves Overall Security

Shares critical web threat intelligence with other Trend Micro products—for better, integrated security

ANTISPYWARE

Trend Micro antispyware solutions block incoming spyware and the outbound data being collected by spyware. Innovative technology also prevents users from browsing Web sites that install tracking software. If spyware is already installed, it automatically cleans the infected systems.

Stops Spyware at Multiple Layers

Delivers end-to-end spyware protection—from the web gateway to client/server networks

Blocks Email-Borne Spyware

Protects against spyware and grayware that propagates via email

Protects Against Web-Borne Spyware

Prevents users from browsing websites known to harbor spyware

Prevents “Drive-by” Downloads

Screens web pages as users browse to block spyware hidden in Applets and ActiveX

Blocks Outbound Communication

Stops spyware that tries to “phone home” before it transmits network or company data over the web

Automates Cleanup

Removes spyware, unwanted grayware, and remnants from servers and desktops

ANTISPAM

Trend Micro is #1 in antispam!* In an independent benchmark test by Opus One, Trend Micro gateway antispam outperformed all other solutions. A key advantage is our adaptable technology that evolves as spamming techniques change and become more sophisticated.

Blocks Spam at Outermost Layer

Stops spam in the cloud before it can enter your network and burden IT resources

Detects Known Spam Sources

Validates email addresses against the largest reputation database of known spammers

Stops Spam in Real Time

Uses dynamic reputation analysis to detect new spam sources, including zombies and bots

Filters Messaging Traffic

Blocks spam at the Internet messaging gateway and mail servers before it can impact employee productivity

Improves Spam Detection

Combines statistical analysis, heuristics, pattern recognition, blacklists and whitelists for better detection

Enables Customization

Provides the ability to customize policies and spam tolerance levels for groups or individuals

Stops Bots from Spewing Spam

Blocks bot communication to preserve bandwidth and prevent the spread of spam and crimeware

*Opus One, Results of Anti-Spam Solution Testing, Feb. 2007.

” It is clear to me that Trend Micro stays on top of the latest threats... and reacts faster to give us protection as quickly as possible.“

Tim Burke
Information Systems Security Manager
QBE Regional Companies, Inc.

ANTIVIRUS

Trend Micro antivirus security guards every network entry point—from the web and network perimeter to email and file servers, desktops, and mobile devices.

Delivers Proven Virus Protection

Guards against web and email-borne viruses, worms, and Trojans using reputation services, signatures, heuristics, and more

Stops Network Worms

Runs inline network and host-based scans to detect and block worms and botnets

Contains Outbreaks

Isolates infected network segments—before threats can spread

Enforces Security Compliance

Ensures devices have updated security and critical patches before accessing the network

Blocks Malicious Mobile Code

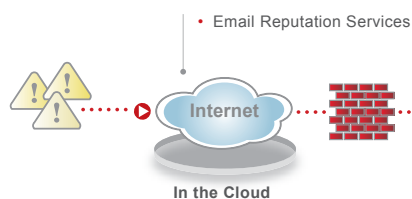

Screens web pages for malware hidden in applets, ActiveX, JavaScript, and VBScript

Automates Damage Cleanup

Removes viruses, worms, Trojans, and remnants from servers and clients including guest devices

Stops Zero-Day Threats in Real Time

Monitors your corporate network to detect suspicious activity—before an attack

Trend Micro Security Deployment

- Integrates comprehensive threat protection in a single platform
- Protects every critical entry point
- Enables centralized management
- Supports heterogeneous environments

ANTIPHISHING

Trend Micro antiphishing security offers a comprehensive approach to stop identity theft and protect confidential corporate information.

Stops Phishing Earlier

Blocks email from known phishing sources in the cloud—before it can enter your network

Filters Messaging Traffic

Stops fraudulent, phishing-related email at the messaging gateway and mail servers

Delivers Targeted Protection

Analyzes URLs embedded in phishing email and delivers signature files to block the threats

Filters Outbound Email

Stops the transmission of outbound data to known phishing-related websites

Protects Against Theft

Stops unauthorized transmission of credit card and bank account numbers, usernames, passwords, and other private data

WEB FILTERING

Trend Micro content and URL filtering enable companies to manage employee email and Internet use in accordance with regulatory compliance and corporate security standards.

Filters Incoming and Outgoing Content

Blocks unwanted content from entering your network and prevents sensitive data from going out

Limits Exposure to Inappropriate Content

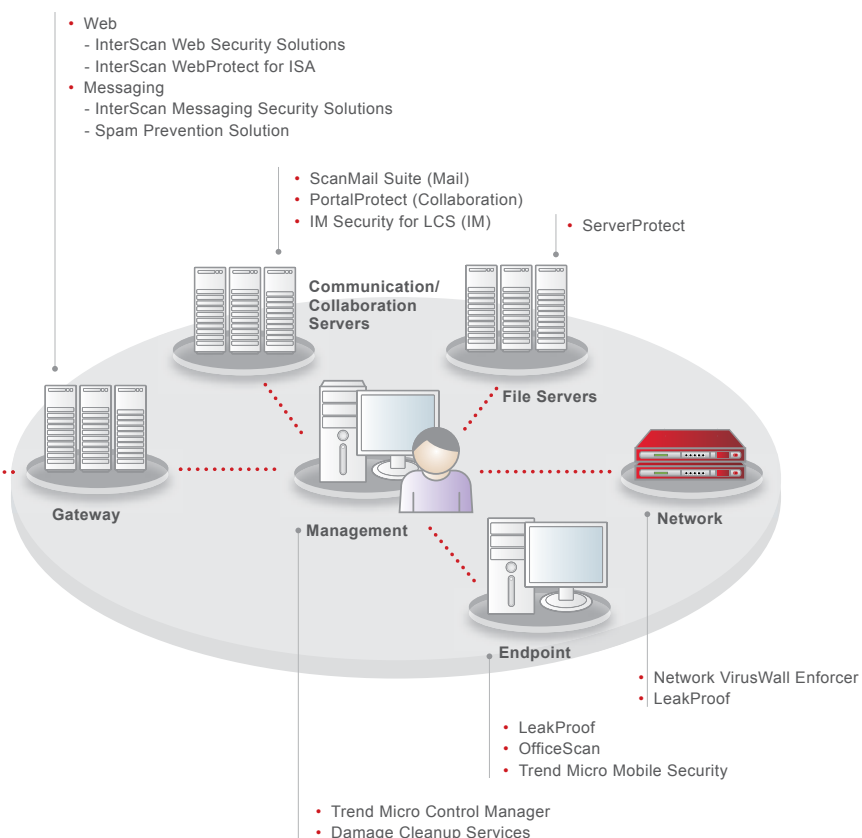

Enables IT to set web-use and email content policies for the company, groups, or individuals

Categorizes Web Sites in Real Time

Employs dynamic rating technology to categorize websites while users browse

Reduces IT Burden

Delivers scheduled and real-time reports and supports external directory services

DATA LEAK PREVENTION

Trend Micro data leak prevention security combines endpoint-based enforcement with highly accurate fingerprinting and content matching technology. It protects sensitive information and customer privacy to help you meet today's stringent regulatory compliance standards.

Protects Privacy

Prevents improper use of customer and employee information and secures intellectual property

Secures Network Perimeter and Endpoints

Prevents leaks at network channels, ports and endpoints, including USB drives and CD burners

Supports Regulatory Compliance

Monitors usage, scans endpoints, and educates employees to reduce risk

Discovers Sensitive Data

Finds sensitive data on laptops, desktops, and servers

Educate Employees

Enables you to customize interactive dialogs for employee education and workflows

Enterprise-Wide Security

Trend Micro's enterprise-wide security solution integrates multiple layers of products and services centrally managed via **Trend Micro Control Manager™**. Seamless inter-product collaboration ensures maximum protection at all critical entry points. For maximum flexibility and scalability, Trend Micro offers hosted services on the **Trend Micro SecureCloud™** platform. To maximize the effectiveness of security, **Trend Micro™ Premium Support** offers personalized, proactive technical support.

TREND MICRO PRODUCTS & SERVICES

The products listed in the chart below represent the full-featured versions of Trend Micro enterprise security solutions.

MESSAGING SECURITY

Trend Micro Products & Services	Anti-virus	Anti-spyware	Anti-spam	Anti-phishing	Email Reputation	Web Reputation	URL Filtering	Data Leak Prevention
